

Critical SPM maintenance at Ghana oil refinery

Provision of air diving personnel and equipment in support of inspection and maintenance of customer-owned SPM and relating facilities. Additional support for tanker mooring operations and general field support as required by the customer.

Vessels and plant utilised:

- Seaways 10 - acting as mother vessel that comes with full IMCA air dive spread DO 23
- Sampson – SRP dive vessel DO 40
- Subsea cleaning and rigging package

Customer	Tema Oil Refinery
Contractor	Ghana Petroleum Mooring Systems
Location	Ghana
Start date	1 March 2018
End date	1 August 2020

The solution

During the operation, the James Fisher Subtech air diving team successfully provided the following services:

- Inspection of subsea and floating hoses
- Maintenance of SPM including surface and subsea intervention
- PLEM inspection and maintenance
- Hose change outs
- Support during tanker mooring operations on SPM and four-point mooring system
- PMS reporting
